Whether you're just getting started or looking to refine your technique, the **TSPS Injector Course, sponsored by Allergan Aesthetics**, is a one-day educational experience designed for clinicians at all stages of their aesthetic journey—offering a valuable opportunity to learn from leading industry professionals and enhance patient outcomes with greater confidence and precision.

Course content is thoughtfully curated by **Allergan Aesthetics** to deliver meaningful insight and real-world relevance for providers working in plastic surgery practices, medical spas, or aesthetic-focused clinics.

Who Should Attend?

This course is ideal for mid-level providers, clinicians, nurses, and other licensed healthcare professionals who work under physician supervision in plastic surgery or aesthetic medicine practices. Whether you're new to injectables or have years of experience, you'll leave with practical pearls and refreshed perspective.

Join us and take your aesthetic practice to the next level with the confidence, skills, and insight that only TSPS can deliver.

Please Note: This course does not provide CME credit or certification. It is intended to provide a knowledge-rich, professionally guided experience created to support continuous learning, sharpen your approach, and inspire excellence in aesthetic care.
